

FCC,

As a very satisfied XM satellite customer I am opposed to any regulations that hamper, dictate, or otherwise try and control the content of XM satellite radio or any other type of satellite radio service. I pay for this service and do not like the idea of any government entity toying with it's ability to offer it's customers whatever it's customers desire. Let the market place dictate satellite radio content not the government. I oppose HR 4026!

Thank you,

A. Kenyon
